Product Description

The Sliding Balcony Door combines elegant design, maximum reliability and outstanding functionality for modern cruise ship architecture. Whether for newbuild projects or refurbishment programs, the Sliding Balcony Door offers a sophisticated solution for premium passenger cabins and balcony suites.

Benefits

Superior Passenger Experience:

- smooth and silent operation
- unobstructed sea views

Built for Marine Conditions:

- corrosion resistant materials

Enhanced Safety:

- self locking end-position

Design Flexibility:

- custom color finishes
- individual cladding solutions

Technical Features

Construction

- Frame made from pre-anodized and coated aluminum
- V4A stainless steel fittings and bearings
- Design load from 2.5 kN/m²
- Self-locking end position

Weather Performance

- Sealing performance increases under pressure load
- Marine-grade construction

Surface Finishes

- Two-color coating available
- RAL color customization
- Individual cladding concepts for project-specific designs

Glass Options

1. Insulated Glass Unit
glued between frame profiles
2. Bonded Stepped Glass
homogeneous external surface
