

Brombach + Gess develops new solar glazing solutions

Brombach + Gess has extended its product portfolio with its new solar glazing panes for cruise vessel facades, windows, balconies and other areas.

The laminated panes have a thin and translucent solar film, which filters up to 99 per cent of the harmful ultraviolet and infrared radiation from sunlight. The photovoltaic glass also insulates acoustically and thermally, which provides savings in power generation. With the same mechanical properties as conventional glass,

photovoltaic glass can be produced in almost any colour, thickness, shape and size.

The company also has a new assortment of interior glazing solutions. These new offerings include doors, partitions, and walkable glass stairs, alongside decorative glass panes.

Brombach + Gess will demonstrate its new solar glazing system and its flexible railing system BalustradeMove at Cruise Ship Interior Expo in Miami, Florida, on 6-7 June 2024.

Skopos Fabrics debuts new Encanto fabric range

UK-based Skopos Fabrics has launched a new range of fabrics suitable for use in cruise ship interiors. Fabrics in the Encanto range are antimicrobial, resistant to soil and stains, and have an impervious, waterproof layer. They can be used alone or in combination with Skopos' textural plain fabrics for furniture pieces. The collection palette includes pops of colour or classical neutrals.

The collection meets UK and European flame-retardancy requirements and International Maritime Organization standards. It has also been certified with the Marine Equipment Directive Wheelmark, confirming its suitability for cruise ship interiors. The designs are halogen-free, Oeko-tex 100 compliant and Reach compliant, with Crib 5 flame-retardant backing.

Metalcolour to deliver Dobel to Disney Destiny

Metalcolour is to supply approximately 200,000 square metres of Dobel Film Laminated Steel for the interiors of Disney Cruise Line's next Wish-class ship, Disney Destiny. The product will be installed in cabins, corridors, wet rooms and on doors onboard Disney Destiny, which will begin operating in 2026.

Metalcolour has previously supplied its Dobel product for some of Disney's previous ships, including Disney Wish and Disney Treasure.
