marine glazing - Ideas in Glass®

Product Description

Brombach + Gess has taken architects and designers' desire to design continuous glass facades such that integrated doors no longer cause a break in the overall view into account.

Sliding doors are predominantly used in areas when space is at a premium and high design standards are required, for example in VIP areas, lofts or suites.

Sliding Concept

The door concept is equipped with an automatic button. Both from the inside and the outside, the door can only be spotted by the button.

At the press of a button, the door element moves forward out of the facade, slides to the side and leaves the passage clear.
